

## source-address

---

**Syntax** source-address *sourceAddress*

no source-address

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Specifies a source IP address for the LAC tunnel endpoint. The **no** version removes the source address.

**Options** ■ *sourceAddress*—Address of the local tunnel endpoint (the LAC); can be up to 32 characters (no spaces)

**Mode** Domain Map Tunnel Configuration, Tunnel Group Tunnel Configuration
