

sscc retryTimer

Syntax `sscc retryTimer timer`

`no sscc retryTimer [timer]`

Release Information Command introduced before JUNOS Release 7.1.0.

Description Configures the delay period during which the SRC client (formerly SSCC) waits for a response from an SRC (formerly SDX or SSC) server. When the timer expires, the client submits the request to the next server and waits again for the timer to expire. The request is sent to each timer in rotation until there is a response. The **no** version restores the default delay period, 90 seconds.

Options ■ *timer*—Time in the range 5–300 seconds

Mode Global Configuration
