

traffic-class

Syntax In Classifier Group Configuration mode:

[no] [suspend] traffic-class *trafficClassName1*

In Global Configuration and Traffic Class Group Configuration modes:

[no] traffic-class *trafficClassName2*

Release Information Command introduced before JUNOS Release 7.1.0.

Description In Classifier Group Configuration mode, specifies a traffic class in a policy list for policy management. The **no** version removes a traffic class from a policy list; the **suspend** version temporarily suspends the policy rule; the **no suspend** version resumes application of a suspended rule.

NOTE: This command replaces the Policy List Configuration version of the **traffic-class** command, which may be removed completely in a future release.

In Global Configuration mode, configures a traffic class in the E-series router. In Traffic Class Group Configuration mode, specifies a traffic class that belongs to the traffic-class group. The **no** version deletes the traffic class.

- Options**
- *trafficClassName1*—Name of the traffic class; up to 40 characters
 - *trafficClassName2*—Name of the traffic class; up to 31 characters

Mode Classifier Group Configuration, Global Configuration, Traffic Class Group Configuration
