

## atm policy

---

**Syntax** atm policy { input | output } *policyName*  
[ statistics { enabled [ preserve | merge ] | disabled [ merge ] } | merge ]  
  
no atm policy { input | output } [ *policyName* ]

**Release Information** Command introduced in JUNOS Release 7.1.0.  
**merge** keyword added in JUNOS Release 7.2.0.

**Description** Assigns a policy list to the ingress or egress of an ATM interface. If you enter this command when the policy list does not exist, the router creates a policy list with a filter rule as the default. You must specify the **input** or **output** keyword to assign the policy list to the ingress or egress of the interface. The **no** version removes the association between a policy list and an interface.

- Options**
- input—Applies policy to data arriving at this interface
  - output—Applies policy to data leaving this interface
  - *policyName*—Name of the policy; a maximum of 40 characters
  - statistics—Enables or disables collection of policy routing statistics
    - enabled—Enables collection of policy routing statistics
    - preserve—Preserves existing statistics for any classifier-list that is the same for both the new and old policy attachments when you attach a new policy to an interface
    - disabled—Disables collection of policy routing statistics
  - merge—Enables merging of multiple policies to form a single policy

**Mode** Interface Configuration
