

ip address

Syntax ip address *ipAddress ipMask* [secondary]
no ip address [*ipAddress ipMask* [secondary]]

Release Information Command introduced before JUNOS Release 7.1.0.

Description Sets a primary or secondary IP address for an interface or subinterface. The **no** version removes an IP address or disables IP processing. You must specify the layer 2 encapsulation before you can set the IP address.

- Options**
- *ipAddress*—IP address in 32-bit dotted decimal format (for example, 192.56.32.2)
 - *ipMask*—mask for associated IP subnet in dotted decimal or prefix length notation
 - *secondary*—Specifies that the configured address is a secondary IP address; if omitted, the configured address is the primary IP address

Mode Interface Configuration, Profile Configuration, Subinterface Configuration
