

## ip vrrp virtual-address

---

**Syntax** ip vrrp *vrid* virtual-address { auto | ipAddress *ipAddress* [ ipAddress *ipAddress* ]\* }  
no ip vrrp *vrid* virtual-address [ ipAddress *ipAddress* ]\*

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Associates an IP address with a VRID. The **no** version removes a list of IP addresses associated with a VRID. The **no** version clears the auto flag, if auto addresses are being used. There is no default.

- Options**
- *vrid*—VRID identifier; a number in the range 1–255
  - *ipAddress*—IP address
  - \*—Indicates that one or more parameters can be repeated multiple times in a list in the command line

**Mode** Interface Configuration
