

radius calling-station-delimiter

Syntax radius calling-station-delimiter *delimiter*
no radius calling-station-delimiter

Release Information Command introduced before JUNOS Release 7.1.0.

Description Specifies the delimiter for DSL PPP users for RADIUS attribute 31, Calling-Station-Id. The **no** version removes the delimiter.

Options ■ *delimiter*—Special character to set off items in the Calling-Station-Id's definition (for example, # or %)

Mode Global Configuration
