

service-management owner-session

Syntax [no] service-management owner-session *ownerName* *ownerId*
service-session *serviceName* [service-session-profile *profileName*]

Release Information Command introduced in JUNOS Release 8.0.0.

Description Activates subscriber service sessions based on the specified owner and owner-generated ID. The **no** version gracefully removes the specified service session for the specified owner session.

Privileged Exec mode creates a dynamic subscriber service session that is deleted after a router reboot. Global Configuration mode creates a persistent service session.

- Options**
- *ownerName*—Name of the owner for the owner session; AAA for RADIUS-based subscribers
 - *ownerId*—Unique ID that is generated by the owner; Acct-Session-ID for AAA subscriber sessions
 - *serviceName*—Name of the service session to use
 - *profileName*—Name of the service session profile to use for the service session

Mode Global Configuration, Privileged Exec
