

service-management service-session-profile

Syntax [no] service-management service-session-profile *profileName*

Release Information Command introduced in JUNOS Release 7.2.0.

Description Creates a new Service Manager service session profile or specifies the name of an existing service session profile, then enters Service Session Profile Configuration mode. The **no** version removes the service session profile.

Options ■ *profileName*—Name of the service session profile

Mode Global Configuration
