

## terminate-code

---

**Syntax**    `terminate-code application terminateReason translationApplication terminateCode`  
`no terminate-code application terminateReason translationApplication`

**Release Information**    Command introduced in JUNOS Release 7.3.0.

**Description**    Configures custom mappings of application terminate reasons to RADIUS Acct-Terminate-Cause codes. The **no** version restores the default mappings.

- Options**
- *application*—Application; AAA, L2TP, PPP, or RADIUS client
  - *terminateReason*—Reason that the subscriber's session was terminated
  - *translationApplication*—Application whose terminate code is used for the mapping; for example, RADIUS
  - *terminateCode*—Standards-based code used by the translation application to identify the terminate reason; for example, a RADIUS Acct-Terminate-Cause code

**Mode**    Global Configuration
