

aaa ipv6-nd-ra-prefix framed-ipv6-prefix

Syntax [no] aaa ipv6-nd-ra-prefix framed-ipv6-prefix

Release Information Command introduced in JUNOS Release 10.1.0.

Description Sets the Framed-IPv6-Prefix RADIUS attribute to be used for IPv6 Neighbor Discovery router advertisements. The **no** version restores the default behavior, which causes the IPv6-NdRa-Prefix VSA to be used for router advertisements.

NOTE: If you issue this command before issuing the **aaa dhcpv6-delegated-prefix delegated-ipv6-prefix** command, a warning message is displayed prompting you to configure the Delegated-IPv6-Prefix attribute for DHCPv6 Prefix Delegation. The message also states that the Framed-IPv6-Prefix RADIUS attribute will be used for both IPv6 Neighbor Discovery router advertisements and DHCPv6 Prefix Delegation if you do not configure the Delegated-IPv6-Prefix attribute for Prefix Delegation.

This warning message is displayed only if you configured the logging severity level as warning for the aaaServerGeneral logging event category.
