

clear ip pim remote-neighbor count

Syntax clear ip pim remote-neighbor [*ipAddress*] count

Release Information Command introduced before JUNOS Release 7.1.0.

Description Clears the counters for remote neighbor statistics on all interfaces or the specified interface. There is no **no** version.

NOTE: This command is typically used when you configure PIM remote neighbors to run multicast services over BGP/MPLS VPNs. That functionality is no longer supported.

Options ■ *ipAddress*—IP address of the interface

Mode Privileged Exec, User Exec
