

ip dhcp-external recreate-subscriber-interface

Syntax [no] ip dhcp-external recreate-subscriber-interface

Release Information Command introduced in JUNOS Release 9.2.0.

Description Configures the DHCP external server application to delete and re-create the existing dynamic subscriber interface after a bound DHCP client extends its IP address lease by restarting the DHCP discovery process on its primary IP interface instead of by initiating the DHCP renewal process on its dynamic subscriber interface. This command is specific to a virtual router. The **no** version restores the default behavior, which preserves the dynamic subscriber interface after a bound client restarts the discovery process on its primary IP interface.

Mode Global Configuration
