

radius algorithm

Syntax radius algorithm { direct | round-robin }
no radius algorithm

Release Information Command introduced before JUNOS Release 7.1.0.

Description Specifies the algorithm that the RADIUS client uses to contact the RADIUS server. The **no** version restores the default value, direct.

- Options**
- direct—Contacts the first AAA server on the list for each user, the second AAA server if the first one fails, and so on
 - round-robin—Contacts the first AAA server for the first user, the second AAA server for the second user, and so on

Mode Global Configuration
