

## radius ethernet-port-type

---

**Syntax** radius ethernet-port-type [ virtual | ethernet ]  
no radius ethernet-port-type

**Release Information** Command introduced before JUNOS Release 7.1.0.

**Description** Indicates to RADIUS which Ethernet port type to use in RADIUS attribute 61, NAS-Port-Type, for all Ethernet users on the E Series router. The **no** version restores the default, ethernet.

- Options**
- virtual—Sets RADIUS NAS-Port-Type to virtual
  - ethernet—Sets RADIUS NAS-Port-Type to Ethernet

**Mode** Global Configuration
