

radius override nas-ip-addr tunnel-client-endpoint

Syntax radius override nas-ip-addr tunnel-client-endpoint
no radius override nas-ip-addr

Release Information Command introduced before JUNOS Release 7.1.0.

Description Configures the RADIUS client (LNS) to override the standard use of the NAS-IP-Address [4] RADIUS attribute and instead use the tunnel-client-endpoint (LAC) IP address. The **no** version restores the default address.

Mode Global Configuration
