

license issu

Syntax license issu *licenseKey*
 no license issu

Release Information Command introduced in JUNOS Release 9.2.0.

Description Specifies the unified ISSU license key for the ERX-1440 router provided by your sales representative or Juniper Networks Customer Service. No license key is required or available for the E120 and E320 routers. The **no** version disables the license.

Options ■ *licenseKey*—Unique string of alphanumeric characters that we provide to you

Mode Global Configuration
