

Overview of the SRC CLI

The SRC CLI is a JUNOS-like command shell that runs on top of a Linux-based operating system kernel on a C-series Controller. By leveraging industry-standard tools and utilities, the CLI provides a powerful set of commands you can use to monitor and configure the SRC software and a C-series Controller.

The SRC CLI is a straightforward command interface. You type commands on a single line, and the commands are executed when you press the **Enter** key. The CLI provides `comm` and `help` and command completion, and supports Emacs-style keyboard sequences that allow you to move around on a command line and scroll through recently executed commands.
