

Overview of Enterprise Manager Portal

IT managers who connect to the SRC network through a JUNOS routing platform or JUNOSe router can use Enterprise Manager Portal to activate services, subscribers, and subscriptions for that enterprise. The services that IT managers can use depend on those that the service provider offers. In SRC-managed environments that include both JUNOS routing platforms and JUNOSe routers, the router type determines which types of services can be configured on a system. The portal does not indicate whether a router is a JUNOS routing platform or a JUNOSe router. Table 1 on page 1 lists the types of services that can be configured from Enterprise Manager Portal for JUNOSe routers and JUNOS routing platforms.

Table 1: Portal Configuration Support for Services on Routers

Type of Service	JUNOSe Router	JUNOS Routing Platform
BoD services	Yes	Yes
VPNs	No	Yes
Applications	No	Yes
Firewall services	No	Yes
NAT services	No	Yes

If you offer Network Address Translation (NAT) services, IT managers can also use the portal to request public IP addresses for use with NAT services on an access.
