

Configuring the StaticSrcNat Service

You can modify the following substitutions for the StaticSrcNat service; do not modify any other settings or substitutions for this service.

- staticSrcNatMinPriority—Lower limit of the range of precedences available for subscriptions to static source NAT rules
- staticSrcNatMaxPriority—Upper limit of the range of precedences available for subscriptions to static source NAT rules

The values for these parameters must be lower than the precedence settings for the policy rules in the dynsrcnat policy group. This distinction allows static source NAT rules to take priority over dynamic source NAT rules.
