

Entering Values for Statement Options

When values include the following characters—space, single quotation marks (‘), double quotation marks (“ ”), curly braces ({}), brackets ([]), or commas (,)—you must enclose the value in quotation marks (“ ”) or use a backslash (\) before the character.

To enter words or letters separated by a space, such as a full name with a first name and last name, enclose the words in quotation marks. For example:

"Chris Bee"

To enter multiple values, separate values with a space, and enclose the values with brackets. For example:

[192.0.2.24 192.0.4.25]

To enter a number using a regular expression, use backslashes (\) to escape the brackets. For example:

\[0-9\]
