

Locating and Removing Inactive Subscriptions to a VPN

When an IT manager cancels the export of a VPN, the Enterprise Manager Portal automatically deactivates any active subscriptions to that VPN for the associated extranet client. If an IT manager cancels the export of a VPN at the same time that the extranet client activates a subscription to this VPN, there is a remote possibility that the Enterprise Manager portal will maintain the active subscription.

We recommend that you periodically check for and deactivate these types of invalid subscriptions to prevent this type of invalid subscription.
