

Example: Configuring Different Service Tiers for Different Days (C-Web Interface)

This example shows how to configure a schedule for an audio service to provide:

- Gold level of service on weekends
- Bronze level of service on weekdays

The sample schedule:

- Uses the Audio-Gold and Audio-Bronze services in the sample data.
- Activates the Audio-Gold service and denies the Audio-Bronze service on Saturday.
- Activates the Audio-Bronze service and denies and deactivates the Audio-Gold service on Monday.
- Does not have a preparation time configured for the SAE.

For demonstration purposes, the sample schedule is configured in the global configuration to make the service schedule available to all subscribers to the two audio services. It is assumed that subscribers are continuously logged in to the system to access the audio services.

To configure a schedule to make the Audio-Gold service available on Saturday and Sunday and the Audio-Bronze service available for the rest of the week:

1. Enter a unique name for the service schedule (for example, audioSchedule):
 - a. Click **Configure**, expand **Services**, and Click **Global**.

The Global pane appears.

- b. From the Create new list, select **Schedule**.
- c. In the dialog box, type **audioSchedule** as the name of the new Schedule, and click **OK**.

The Schedule: audioSchedule pane appears.

- d. In the Description box, type a description of the service schedule, and click **Apply**.
