

## Configuring Actions in the Database

---

The ACTION table contains data about services to activate in response to an attack. The administrator must add one ACTION table entry for each SRC service that is used as an action in the Threat Mitigation Application.

The entry in the */opt/UMC/conf/thma/etc/< database > /data.sql* file contains the attributes in the format:

```
INSERT INTO ACTION
VALUES ('<serviceName>', '<name>', '<description>');
```

For example:

```
INSERT INTO ACTION
VALUES ('BlockAttacker', 'Block Attacker', 'This action blocks all traffic to and from
the attacker.');
```
