

Configuration Statements for Adding VPNs and Extranet Clients

Use the following configuration statements to add VPNs and extranet clients at the [edit] hierarchy level.

```
subscribers retailer name vpn vpn-id {
    description description ;
    display-name display-name ;
    extranet-client [ extranet-client ... ];
    imported-extranet [ imported-extrane t...];
}
subscribers retailer name subscriber-folder folder-name enterprise name vpn vpn-id
{
    description description ;
    display-name display-name ;
    extranet-client [ extranet-client ... ];
    imported-extranet [ imported-extrane t...];
}
```

For detailed information about each configuration statement, see the *SRC-PE CLI Command Reference*.
