

Deploying a Sample-Based Enterprise Service Portal

To create a new Web application, set the name of the target WAR file.

1. Select **File > Properties > Tomcat**.
2. Enter the path of the target WAR file in the field WAR file for export.
3. Right-click the portal project, and select **Tomcat Project > Export to the WAR file set** in project properties.
4. Copy the WAR file to the final deployment location; for example, */opt/UMC/jboss/server/default/deploy* on your portal server.
