

Synchronizing Data on a Juniper Networks Database with the C-Web Interface

You can initialize a Juniper Networks database with data from a neighbor. This process also removes any existing data in the database.

To replace data with data from a neighbor (for example, neighbor1):

1. Click **Manage > Request > System > LDAP > Community > Initialize**.

The Initialize page appears.

2. In the Neighbor box, enter the name of the neighbor to be synchronized.
