

## Changing the Location of an Input Directory for the Network Publisher

---

By default, an input file is located in the directory `/opt/UMC/nic/sample/junos/rt`. You can use an input file to troubleshoot the configuration of the network publisher.

You can define a different location for this file in the network publisher configuration in the `/opt/UMC/nic/etc/networkPublisher/config.properties` file.

To change the location of an input file that contains router configuration:

- Edit the `config.properties` file. Specify that the network publisher locate an input file by configuring the following property in the file:

```
/routers/r<number>/input_dir =
```

See [\[Unresolved xref\]](#) .
