

Configuring an SAE Group

Use the **shared** option of the **set slot number sae shared** command to add a new group. Use the **shared sae group *name*** command to configure the group.

To configure a group:

1. From configuration mode, add a group. For example, to add a group called REGION-1 in the path /SAE/:

```
[edit]
user@host# set slot 0 sae shared /SAE/REGION-1
```

2. Commit the configuration.

```
[edit]
user@host# commit
commit complete.
```

3. Configure the group as you would a shared SAE configuration.

```
[edit]
user@host# edit shared sae group REGION-1 ?
Possible completions:
  <[Enter]>      Execute this command
  > configuration
  > dhcp-classifier Configure a DHCP classification script
  > group         Group of SAE configuration properties
  > user-classifier Configure a subscriber classification script
  |              Pipe through a command
```
