

## Adding Operative JUNOS Routing Platforms

---

To add to the directory routers and JUNOS VRs that are currently operative and have an operating SNMP agent:

1. Click **Manage > Request > Network > Discovery**.
2. Enter information as described in the Help text in the main pane, and click **Apply**.

If you add a router using the discover network feature, the software adds the IP address of the first SNMP agent on the router to respond to the discover request.
