

Setting the Action (C-Web Interface)

Before you configure the time schedule, create the schedule.

To configure the actions for the service schedule:

1. Click **Configure**, and navigate to the specified service schedule.
2. Click **Event** in the side pane.

The Event: *<name>* pane appears.

3. From the Create new list:
 - a. Select **Action**.
 - b. In the dialog box, type a name for the new Action, and click **OK**. The specified name is not stored as an identifier, so the arbitrary value can be as simple as a number.

The Action: *<name>* pane appears.

4. Enter the information as described in the Help text in the main pane, and click **Apply**.
 - The Type values (deny and deny-deactivate) apply only to services that have an authorization plug-in configured. For more information, see *Authorizing Scheduled Services (C-Web Interface)* .
 - For more information about the Substitution box, see the *activateService* method of the SAE external interface in the SAE CORBA remote API documentation on the Juniper Networks Web site at

<http://www.juniper.net/techpubs/software/management/src/api-index.html>
