

Configuring Access Control for SNMPv3 Users

To configure access control for SNMPv3 users:

1. Click **Configure**, and expand **SNMP > V3 > USM > Local Engine**.
2. From the Create new list, select User.
3. Enter a name for the new User in the dialog box, and click **OK**.
4. From the side pane, expand the name of the user, and (optional) specify the authentication type and (optional) the encryption.

NOTE: Before you configure encryption, you must configure the authentication type.
