

Modifying the VTA Renaming Rules

To modify the rules used to rename a VTA, edit the */opt/UMC/conf/vta/rules.xml* file. For example, you can substitute different oldString and newString attributes for the `<replace>` element values and save the new values to a new file that you specify as the renaming rules file for the **rename** command.

For information about modifying the renaming rules, see the */opt/UMC/conf/vta/rules.xml* file. This file contains details about the replacement values for the VTA names.
