

Using Policy Web Admin to Search for QoS Policy Information

Before you use Policy Web Admin, deploy the WAR file for the Policy Web Admin in the Web application server. You can find this file, *pomAdmin.war*, in the folder *webapp* on the SRC software distribution. Refer to the documentation for the Web application server for information about deploying applications.

To deploy Policy Web Admin inside JBoss:

- Copy the file to the JBoss *server/default/deploy* directory.

```
cp /cdrom/cdrom0/webapp/pomAdmin.war  
/opt/UMC/jboss/server/default/deploy
```

JBoss automatically starts the application when a WAR file is copied into the deploy directory.

To launch Policy Web Admin:

1. Start your Web browser.
2. Enter the location of Policy Web Admin in the following format:

`https://<web-server-name or ip-address>:<port>/pomAdmin`

The Policy Web Admin page appears.

Policy Web Administration

Welcome to the Policy Web Administration Application.

You can use this application to view configuration and control policies. You have to connect to an LDAP directory before viewing policies or doing a query.

- [Connect](#) to the SDX directory where your Policies are stored.
- [View](#) the policies.
- [Query](#) the system information with regards to Router, QoS Profile and Policy Groups.
