

Adding Comments to Substitutions

To add a comment on the last line of the substitution:

1. Place the Java single-line comment marker (`//`) at the end of the last line of the substitution.
2. Enter the comment.

There is no limit to the length of the comment you can enter. You do not need to use the new line marker in comments. Any text that follows the comment marker, regardless of how many lines the text spans, is treated as part of the comment.

Example—`//This parameter specifies the QoS rate for this service.`

The SRC software supports only the Java single-line comment marker. You cannot use the comment marker for multiple lines or comment markers for other languages.
