

Deploying Dynamic Service Activator on the Virtual Host (SRC CLI)

Use the following configuration statements to deploy Dynamic Service Activator on the virtual host:

```
slot number dsa deploy {  
    virtual-host virtual-host;  
}
```

To deploy the application on the virtual host:

1. From configuration mode, access the configuration statement that configures the virtual host.

```
[edit]  
user@host# edit slot 0 dsa deploy
```

2. Specify the virtual host on which to deploy Dynamic Service Activator. Virtual hosts for Web applications are configured in the application server.

```
[edit slot 0 dsa initial deploy]  
user@host# set virtual-host virtual-host
```
