

Viewing Routing Table Information

Purpose You can display brief or detailed information about the route from the local system to a remote host.

Action To view brief route information:

```
user@host> show route
```

```
Kernel IP routing table
Destination    Gateway         Genmask         Flags   MSS Window  irtt Iface
192.2.2.0      ' ' ' ' ' ' '* 255.255.255.0   U        0  0      0  0    eth0
default        srclab1.mylab. 0.0.0.0         UG        0  0      0  0    eth0
```

To view detailed route information:

```
user@host> show route detail
```

```
Kernel IP routing table
Destination    Gateway         Genmask         Flags Metric Ref  Use Iface MSS  Window  irtt
192.2.2.0      ' ' ' ' ' ' '* 255.255.255.0   U      0    0    0    eth0 ' ' ' '0    0
0
default        srclab1.mylab. 0.0.0.0         UG      0    0    0    eth0 ' ' ' '0    0    0
```

The detailed output includes the additional Metric, Ref, and Use fields.
