

Overview of the Policies, Services, and Subscribers CLI

The Policies, Services, and Subscribers CLI is a part of the CLI that requires separate configuration. Before you can configure policies, services, and subscribers from the CLI, configure access to Policies, Services, and Subscribers CLI, and then enable it.

When you use the Policies, Services, and Subscribers CLI, ensure that only one user makes changes to the data at one time. If more than one user makes changes to the same configuration information for policies, services, or subscriptions, the software stores the first change to the data; subsequent changes are discarded.
