

Before You Configure Logging

Before you configure logging for SRC components, you should be familiar with the logging filters that you can configure. If you use a syslog log facility, you should be familiar with the syslog protocol. For information about logging filters see [Overview of Logging for SRC Components](#).

If you plan to filter log messages, you should be familiar with severity levels and filters for logging before you configure system logging for a component. See [Categories and Severity Levels for Event Messages](#).
