

## Configuring the dynsrcnat Policy Group

---

You can modify the precedence settings in the policy rules for the dynsrcnat policy group. Use the following guidelines if you make changes to the precedence settings:

- The precedence settings for the policy rules in the dynsrcnat policy group must be higher than the precedence settings for the policy rules in the staticsrcnat policy group. This distinction allows static source NAT rules to take priority over dynamic source NAT rules.
- The value for this setting must be higher than the precedence of any firewall exception. This distinction ensures that the SAE activates the artificial firewall rule first.
