

API for Dynamic Service Activator

This topic contains information that developers need to create gateway clients and that administrators need to manage gateway clients and their interactions with the gateway.

Public SOAP Interfaces of Web Applications

When you have installed Dynamic Service Activator, you can access a Web Services Description Language (WSDL) file for the application. The WSDL file defines the SOAP properties that you or your customers can use to develop a gateway client. The URL for Dynamic Service Activator is:

`http://<host>:<portNumber>:/dsa/services/DynamicServiceActivation ?wsdl`

- `<host>`—IP address or name of the host that supports Dynamic Service Activator
- `<portNumber>`—Number of the TCP port
