

## Bandwidth Level Fields in Enterprise Manager Portal

---

Use the field in this topic to define the bandwidth level.

### ***Bandwidth Level***

- Bandwidth assigned to an access link (the basic BoD service in the directory). The bandwidth level governs the overall bandwidth available on the link.
- Value—Menu of bandwidth levels in the directory available for this subscriber. See the online help for information about the menu entries.
- Guidelines—A subscriber can be assigned to up to one bandwidth level on an access link.

In the navigation pane, a subscriber subordinate to the one who has the bandwidth level subscription inherits the subscription. A subordinate subscriber cannot subscribe to another bandwidth level.

If you select default for the value, all traffic is treated the same.

- Default—Bandwidth level specified as the default by the service provider.
