

Preparing to Develop a Sample-Based Enterprise Service Portal

The following instructions describe how to set up a development environment that uses Eclipse and Tomcat on a Solaris platform. If you want to use Eclipse and Tomcat on a different operating system, see the following Web sites:

- For Eclipse <http://www.eclipse.org>
- For Tomcat <http://jakarta.apache.org/tomcat>

To get ready to develop a portal based on the sample Enterprise Service Portal:

1. Download and install Eclipse from <http://www.eclipse.org>
2. Download the Tomcat plug-in for Eclipse from <http://www.sysdeo.com/eclipse/tomcatPlugin.html>
3. Unzip the plug-in into the Eclipse installation directory.
4. Download Tomcat from <http://jakarta.apache.org/tomcat>
5. Install Tomcat:

```
mkdir $HOME/eclipse
cd $HOME/eclipse
unzip /tmp/eclipse-SDK-2.0.2-solaris-motif.zip
unzip /tmp/tomcatPluginV201.zip
cd $HOME
gzip -dc /tmp/tomcat-4.1.18.tar.gz | tar xvf -
```

6. Start Eclipse.
7. Configure the Tomcat plug-in.

Select **Window > Preferences > Tomcat**, and configure the Tomcat version and the path where you installed Tomcat.
