

Writing an Application to Allow a Machine to Provide Public IP Addresses for NAT

If you use Enterprise Manager Portal and NAT Address Management Portal, and you use a machine to administer public IP addresses that you provide to enterprises.

To use a machine to administer public IP addresses:

1. Write an application that handles:
 - E-mails from Enterprise Manager Portal
 - XML messages that NAT Address Management Portal uses to communicate with the software that manages the IP addresses
2. Install the application that you created in the preceding step on a machine that contains the software for managing IP addresses.
