

## Canceling Suspensions of Subscriptions

---

If you suspend a subscription for a subscriber, you can restore the inherited subscription for that subscriber. You can also maintain the suspension for that subscriber and restore the inherited subscription for that subscriber's subordinate subscribers. To do so:

1. Start at the Subscriptions page for the subscriber for which you want to restore the inherited subscription.
2. In the Subscription column, click the subscription you want to allow.
3. Click **Unsuspend**.
