

Configuring Policies for Custom Firewall Exceptions

You can create policies with the Policies, Services, and Subscribers CLI or the Policies, Services, and Subscribers subtasks in the C-Web interface.

To configure a policy for a custom firewall exception:

1. Create a stateless firewall policy group and associated policy rules.
2. Specify parameters for the following properties for each policy rule:
 - IP protocol
 - TOS byte in the IP header
 - Source IP addresses
 - Source TCP/UDP ports
 - Destination IP addresses
 - Destination TCP/UDP ports
 - TCP flags
 - IP flags (fragmentation flags)
 - Fragmentation offset
 - Packet length
 - ICMP type
 - ICMP code

For a sample policy, see *policyGroupName = custom_policer, ou = entjunos_statelessfw, o = Policies, o = umc* in the sample data.
