

Configuring Global UDP Ports

To configure global UDP ports:

1. Click **Configure**, expand **Shared > SAE**, and then expand the SAE group for which you want to configure global UDP ports.
2. In the side pane, expand **Configuration**, and then click **Global RADIUS UDP Port**.

The Global RADIUS UDP Port pane appears.

3. Click **Create**, enter information as described in the Help text in the main pane, and click **Apply**.
