

Configuring File Properties

To configure file properties for logging:

1. Click **Configure**, expand **System > Web Management**, and then click **Logger**.

The Logger pane appears.

2. From the Create new list, select **Logger**.
3. Type a name for the logging file in the dialog box, and click **OK**.
4. In the side pane, expand the logger that you created, and click **File**.

The File pane appears.

5. Click **Create**, enter information as described in the Help text in the main pane, and click **Apply**.
