

Configuring Global and Default Retailer Event Publishers

To configure global and default retailer event publishers:

1. Click **Configure**, expand **Shared > SAE**, and then expand the SAE group for which you want to configure a event publisher.
2. In the side pane, expand **Plug Ins**, and then click **Event Publishers**.

The Event Publishers pane appears.

3. Click **Create**, enter information as described in the Help text in the main pane, and then click **Apply**.
