

Configuring Basic BoD Policies

You can create policies with the Policies, Services, and Subscribers CLI or the Policies, Services, and Subscribers subtasks in the C-Web interface.

To configure a basic BoD policy:

1. Create a policy group and associated policy rules.

Typically the policy rules include JUNOS schedulers, JUNOS policers, JUNOS filters, or JUNOS filters that specify a traffic classification, and basic rules that define best-effort forwarding and drop behavior.

2. Include parameters in the classify-traffic conditions of the policer. Use parameter names from [\[Unresolved xref\]](#).
3. Specify a precedence for the policy rules.

Structure the precedence for policies to ensure that policy rules for JUNOS schedulers and JUNOS policers have a higher precedence, and therefore a lower number, than default policy rules. If the configuration includes BoD services, the policies to support BoD services should have a higher precedence, indicated by a lower number.

For a sample basic BoD policy, see *policyGroupName = basicBod, ou = entjunos, o = Policies, o = umc* in the sample data.
